

FireStorm LED Tailgate Bar

INSTALLATION INSTRUCTIONS

STEP 1:

Clean the area between your tailgate and bumper thoroughly with warm soap and water. The adhesive on the mounting pads of your LED Tailgate Bar will only work once, so the installation area must be free of dust, dirt, and rust, and must be **COMPLETELY DRY** before installation.

STEP 2:

Measure the width of your tailgate and determine the midpoint of this distance by dividing the length by 2. Mark this midpoint, then measure on either side of this mark, and mark the two new points as well to determine the left to right orientation of the LED Tailgate Bar to insure that it is centered.

STEP 3:

The bar is oriented properly on the truck if the wires are coming out of the left side and LEDs are pointing straight out the back. Peel the backing off all of the adhesive pads on the back of the Tailgate Bar and press it very gently onto the vehicle between the marks from Step 2. Step back from the vehicle and make sure the bar is mounted straight. Detach and reapply the pads if necessary to correct the placement.

STEP 4:

Once the Tailgate Bar is attached, you will need to hard wire the Tailgate Bar into your truck. **DO NOT USE TRAILER HARNESS WIRING!** The following colors should be wired directly into the corresponding wires on your vehicle's tail-lights:

BLACK – Connect to any Ground Wire or the – Terminal on your Battery.

RED – **Connect to a Constant 12V+ Signal** (the + Terminal on your Battery)

GREEN – Splice in with the Positive Lead going to your Brake Light* **

YELLOW – Splice in with the Positive Lead going to your Left Turn Signal*

BLUE – Splice in with the Positive Lead going to your Right Turn Signal*

WHITE – Splice in with the Positive Lead going to your Reverse Lights

* The following applies to a minority of trucks: If your vehicle does not have a separate wire for brakes, (i.e. brakes and turn signals are on the same wire) you will need to wire the Tailgate Bar to the turn signals on the front of the vehicle and the third (high mount) brake light in order for the scanning function to work properly.

** If you wish to use your running lights with your Tailgate Bar, see included instructions to support running lights + brake lights on the green wire.

STEP 5:

REGISTER YOUR WARRANTY ONLINE OR BY SENDING THE ENCLOSED FORM!
Your Warranty is not valid if you do not send in your Warranty Registration Form within 30 days! If you would like to request a PlasmaGlow Catalog with our new truck-specific lighting products, visit our website at www.plasmaglow.com

Running Lights Modification For PlasmaGlow LED FireStorm Truck Bar

Install the bar normally but use the diagram above to connect the Brake Light (GREEN) Wire to the Brake Lights and Running Lights of your truck.

If you wish to wire for running lights also, the parts above are required. These parts are readily available for less than \$5 total at any Radio Shack, or PlasmaGlow will provide these Free of charge. Call 1-877-878-4569 and request a Free FireStorm Diode Kit and we will send it directly to your house at no charge.
